## TX-22LT2 22" LCD Display

**Available Now**

Panasonic's new state-of-the-art LCD technology presents the ultimate in Display viewing. Revolutionary manufacturing have achieved highly advanced LCD Display's with a host of innovations that deliver an entertainment experience.

### Widescreen

These widescreen (16:9) aspect LCD panels have a number of key picture technologies that combine to deliver a clear, sharp and lifelike image.

### Active Light Control

Active Light Control is circuitry, which automatically detects the brightness levels of the input signal and adjusts the backlight accordingly in real-time. The screen provides maximum brightness that's up to 1.2 times greater than conventional systems, while its minimum brightness during dark scenes is about one half of conventional systems. The result is a greatly expanded dynamic range from black to white peak, with crisp, natural pictures throughout viewing.

### Active System Control

Active System Control dynamically adjusts the video signal according to the image contrast. Working in conjunction with Active Light Control, it adds greater brightness to bright scenes and brings more depth to dark ones.

## Progressive Cinema Scan

With Progressive Cinema Scan still images processing is used to achieve clear, smooth flowing image detail that closely approaches the original film.

## Dynamic Sharpness Control

Super DSC (Dynamic Sharpness Control) analyses the entire image, minimising picture noise in areas as a cloudless sky), while enhancing areas that have greater detail.

## Digital 3D Y/C Comb Filter

The Digital 3D Y/C Comb Filter accurately separates the colour information from the black and white and removes dot crawl and hanging dots both centrally and vertically.

## Enclosed Speakers

Panasonic LCD TV's have left and right speakers, which are completely enclosed along with a woofer. This configuration gives high quality stereo sound with great depth and power.

## Features

-  16:9 Widescreen Television
-  Active Light Control
-  Active system Control
-  Progressive Cinema Scan
-  Super DSC
-  Digital 3D Y/C Comb Filter
-  Built-in Stereo Speakers and Bass-reflex Woofer

## Specification

Size 55.8cmV

Aspect Ratio 16:9

Pixel Pitch 0.570mm

Pixel (wxh) 854 x 480

### AUDIO OUTPUT

Total Audio Output 2 x 2W + 2.5W x 2

### FEATURES

Wall Mountable Yes

Brightness (cd/m<sup>2</sup>) 400

Contrast Ratio 450/1

Tuner Yes

Teletext Yes

Q-Link No

Viewing angle 160 degrees

Power Consumption 69W

Standby Power Consumption 3W

#### TERMINALS

AV1 21pin RGB Yes

AV2 21pin Video/s-Video Yes

AV2 4pin S-Video/RCA Video No

AV3 4pin S-Video/RCA Video Yes

#### DIMENSIONS

w x d x h with stand (mm) 586 x 240 x 424

w x d x h without stand (mm) 586 x 67 x 388

Weight (kg) 11.5
